

ZEN DEN

ENHANCING
WELLBEING
THROUGH
SENSORY-
ENABLED
DESIGN

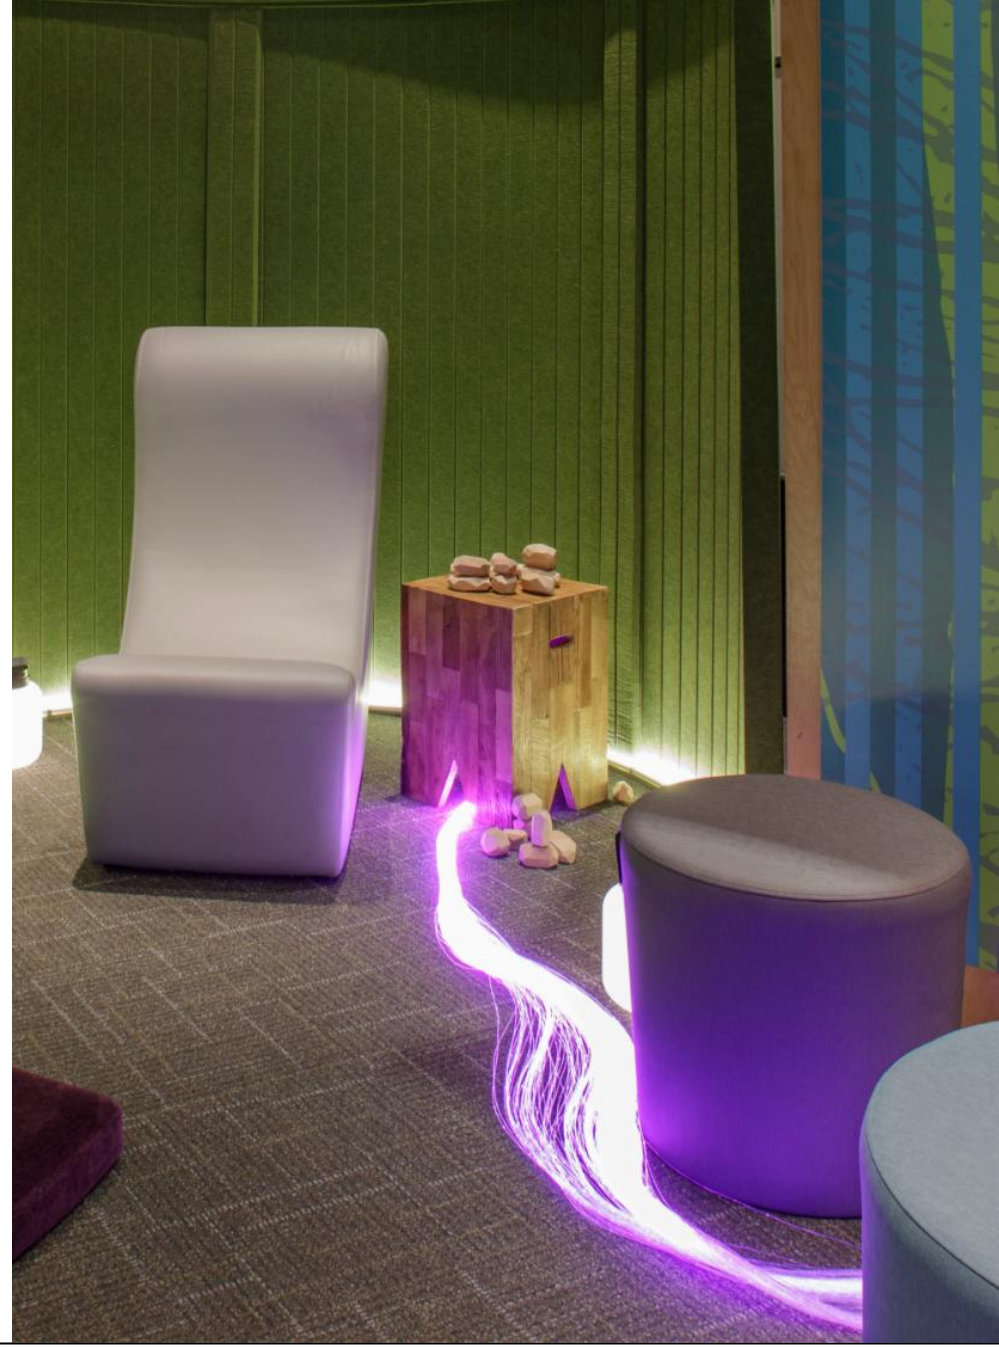

Stantec

In brief...

The ZenDen is crafted to address a wide range of sensory needs, from hypersensitive to hyposensitive individuals. It's felt panel system provides a portable and adaptable solution, ideal for challenging environments like convention halls or education facilities where architectural changes are not possible or out of budget.

By incorporating auditory, full-spectrum lighting, olfactory stimulation, and sound-absorbing materials, the ZenDen offers rich, immersive experience that is both functional and inviting. This proof of concept highlights the potential to transform any space into an inclusive, multi-sensory environment, balancing practicality with creative design.

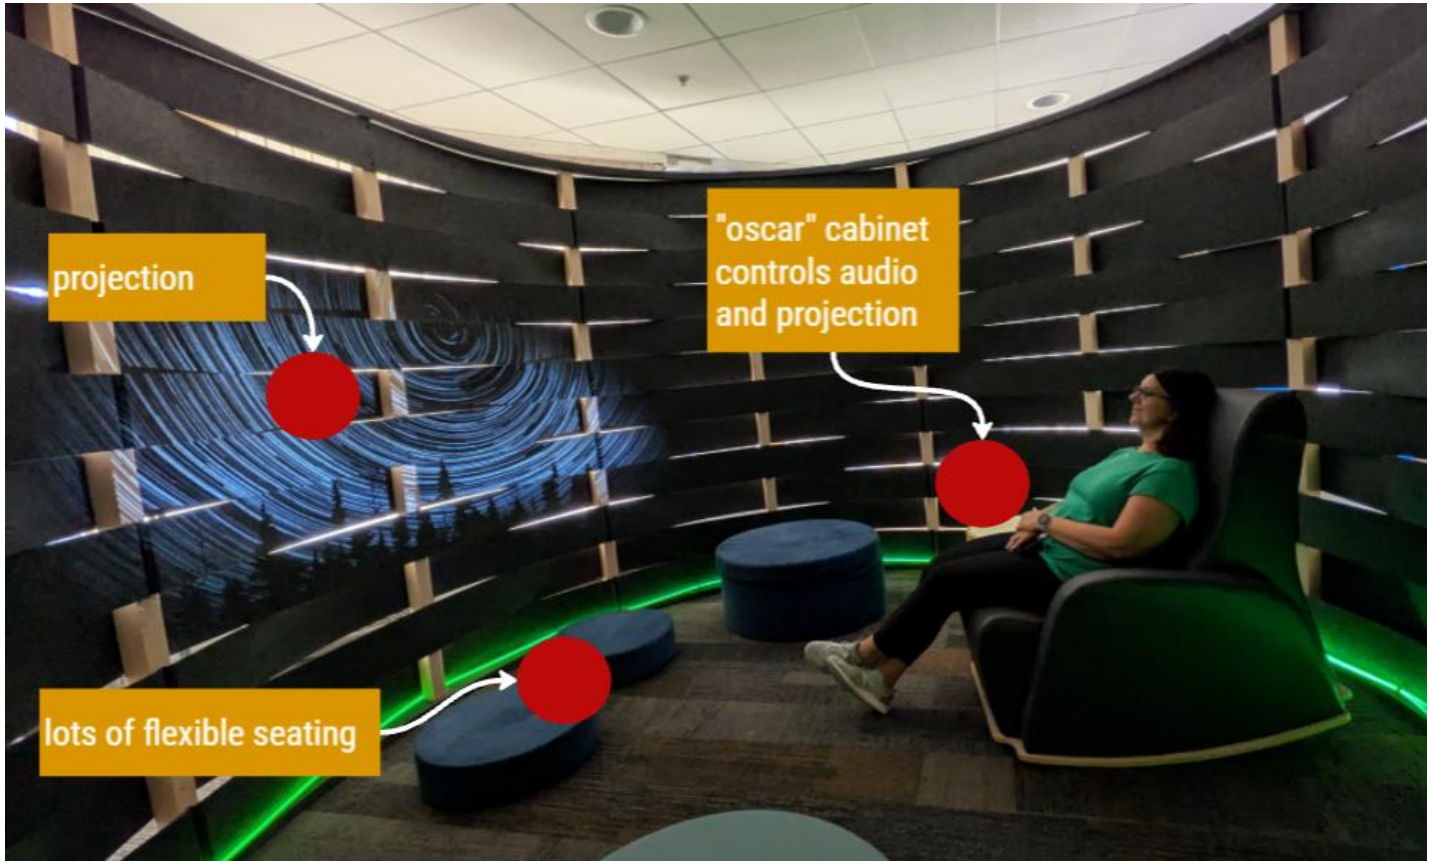

ZenDen at Syracuse University

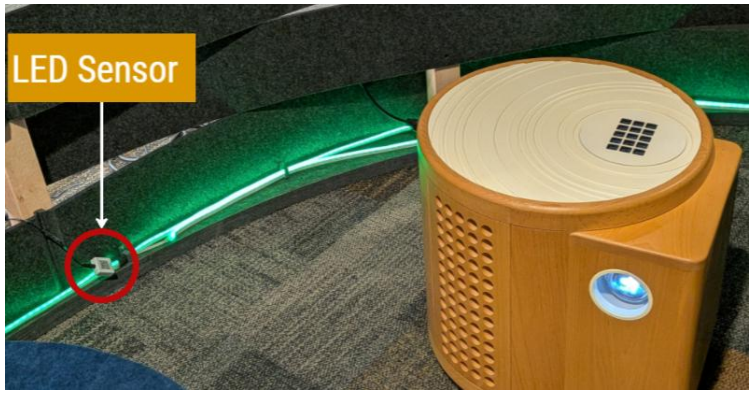

Cavern

The Cavern provides a calming environment for hypersensitive individuals, using soft lighting, subtle scents, and sound-absorbing materials to create a soothing, tranquil space.
